

Products & Services

We are not only selling tactical fiber optic cables, but also all the relevant services as partner for areas like consultancy, system engineering, project management, training, maintenance and long term life-cycle support.

Cable assemblies made ready to use

The fiber optic cables BRUmil, BRUtough and BRUpowermil are offered together with a large variety of reels, starting from hand-reels over backpack reels to different vehicle reels made ready for use in the field with the corresponding military lens connectors. To connect these cables with the customer's communication equipment, Brugg Cables offer all necessary connecting cables or even copper cables for different applications.

Cable assemblies according to the customer requirements

Consultancy, System Engineering

Our highly trained professionals can assist you in specialist cable solutions; in designing optical termination units at the cable end or to develop custom specific solutions together with third parties to find the best possible solution. The BRUMIL systems are an example of a solution executed to different variations for several customers. Should assistance be required please do not hesitate to contact our specialists.

BRUMIL solutions e.g. rugged media converter

Training

Well-trained staff is the key to achieve lowest possible lifetime costs and reaching long lifecycle of our robust tactical cable assemblies in the harsh surroundings. Therefore we offer deployment trainings of cables together with our large selection of deployment accessories, like wedge clamps, cable shoes, masts etc. During such trainings the emergency cable repair and testing of cables can be trained with the BRUMIL repair and test kits. The complete service package as training, test- and repair kits, allow the customer for immediate operation continuity and will extend the lifecycle at lower cost.

Training in the field

Emergency repair in the field

Maintenance

At our manufacturing facilities we already carry out the maintenance for delivered cables under maintenance contracts awarded by different armed forces.
