

Course I (E): High Voltage Polymer Cables

Providing key information on and around polymer cable systems.

Target group

Personnel from electric utilities or companies employing polymer cable systems.

Number of participants

Max. 13

Specific focus of course contents

- Polymer cable designs with focus on XLPE cables
- Conductor types
- Different types of polymer compounds
- Basics of high voltage polymer cable accessories (brief coverage)
- Cable manufacturing
- Installation
- Heat dissipation during operation
- Best-practice experiences of polymer cable systems in operation
- Inspection of polymer cable production units

Methods

Theory: 100%

Demo: 0%

Practice: 0%

Duration

2 days

Venue

Brugg Cables Academy Schulungsräume, Industriestrasse 19, 5200 Brugg

Trainer

Thomas Jödicke, Brugg Cables

Costs

CHF 2800.--

Language
